

Bitpalast® Decryption for Word 97, 2000 & 2003/XP¹ **Guaranteed¹** to make password-protected files readable on the same workingday³ of your order!

Have you forgotten the password for your Word file? Has a member of staff encrypted important data and left you in the lurch? Do you need to access your Word file but your password doesn't work? Existing methods of cracking your file's password fail as standard password crackers test terms from a dictionary. However, the number of passwords is unlimited, and many also contain numbers and special characters. Only a fraction of all possible passwords is contained in dictionaries. Even the fastest computers would need many years to test all conceivable combinations.

Bitpalast® gives you a 100% guarantee¹ that you will be able to read and use your file within the same workingday³ of your order, regardless of the length or complexity of the password.² How does it work? We test over a trillion possible keys to your Word file and guarantee¹ that we will find the right one. A key is a mathematical code. While there can be an infinite number of passwords, there is only a finite number of keys to open a Word file. Bitpalast® renders your Word file usable again by trying every possible key. Instead of working out the password, Bitpalast® identifies the mathematical code that opens the file.

- ✓ **100% guaranteed¹ decryption within the same workingday³ of your order** regardless of the length or complexity of the password²
- ✓ **100% high-tech computer performance**
Many powerful computers search around the clock for the correct key for you – and find it guaranteed¹.
- ✓ **100% security**
Your data is handled in confidence.

1) XP versions only if the file has been encrypted with the default setting of 40-bit encryption. French versions of Word 97, 2000 & XP are not covered. Files saved/encrypted using the „Information Rights Service for Microsoft Office“ cannot be decrypted. 2) Bitpalast® does not work out the password used to encrypt the file, instead we make the content readable and usable. You receive a Word file that looks as though it had never been encrypted with a password. 3) Signed order certificate must be received before 11 a.m. EST. © 2006 Bitpalast GmbH. All rights reserved.
