

Microsoft™ Office FrontPage™ 2003

Customize all parts of your website yourself

If your website wasn't designed by Bitpalast® and you need to make changes to it, you will probably have to turn to your Internet agency. You may have also acquired a "content management system" from them. Although this will let you edit a couple of texts on your website, there will still be a lot of things you can't do, such as make changes to images and logos, fonts, and colors, add or delete topics, add new fields to your contact form, and more. You are tied to your Internet agency.

Bitpalast®, on the other hand, allows you free access to all areas of your website and hands you control of its functions. You can maintain your site quickly & easily using Microsoft™ FrontPage™. Editing a Bitpalast® website with Microsoft™ FrontPage™ is as easy as writing a text in Microsoft™ Word™ – you don't need to know anything about HTML or programming. Microsoft™ FrontPage™ has a proven track record globally and is the ideal solution that gives you independence.

For instance, you can add, amend, and delete pages, exchange images and texts, and change colors, background images, fonts, headings, user guidance and menus, style sheets, JavaScripts, forms – the possibilities are practically endless.

- ✓ Several authors can edit your FrontPage™ website simultaneously from anywhere.²⁾ You may want to make straightforward changes yourself and hand trickier tasks over to Bitpalast®.
- ✓ Changes made to your site are immediately visible on the Internet. Laborious uploads are a thing of the past due to the fact that your site is managed centrally on the web server.
- ✓ Although Microsoft™ FrontPage™ provides everything you need for quick & simple site maintenance, it costs a lot less than comparable technologies from other suppliers.

Tax-free for non-EU residents & companies. Offer good for businesses outside European Union only.

1) System requirements: 128 MB RAM or more, 180 MB hard disk space available (The amount of disk space required depends on the functions selected during a user-defined installation. The optional cache for installation files (recommended) requires a further 200 MB available space on your hard drive.), Super VGA display or higher. Contact Bitpalast® in case you cannot fulfill the system requirements for an alternative. 2) Further licenses are required for further seats. For teamwork, the site must run on a web server that supports the Microsoft™ FrontPage™ extensions. The FrontPage™ extensions are supplied by almost all providers. © 2006 Bitpalast GmbH.
