

Bitpalast® Hosting Artists' Server

All your artists' domains on one web server

Do your artists have their own domains at other agencies? Become a web host yourself and rent out space on your server to your artists and clients! Each website on your Bitpalast® Artists' Server is independent of all other sites on the server. You can operate an unlimited number of domains¹ at the same time and set up as many independent e-mail addresses and redirects as you want. The Bitpalast® Hosting Artists' Server is ideal for artist, model, advertising and promotion agencies, music producers, and PR and personality managers.

You alone decide the terms that apply to artists using web space on your Bitpalast® Artists' Server, including how much server space and what privileges you assign your artists and clients.

- ✓ **Closer customer relations!**
By offering to host your artists' domains, you bind them more closely to your agency. You become all they need!
- ✓ **Practically any configuration is possible**
The Bitpalast® Artists' Server supports all common programs such as PHP, MySQL and Microsoft™ FrontPage™. You can operate sites with or without content management, set up independent databases and reproduce any e-mail configuration. You don't need any technical equipment or IT expertise yourself as Bitpalast® handles all set-up and operational tasks for you.
- ✓ **Includes Bitpalast® Urchin™ Statistics**
You can deploy the legendary Bitpalast® Urchin™ Statistics for 100 of your domains. The statistics give you exact user numbers and not meaningless "accesses," "hits" or "server figures": after all, a user who clicks through five different pages of a site is ultimately still just one user!
- ✓ **Reliable fixed price & unlimited traffic**
The Bitpalast® Artists' Server is charged at a fixed price that covers all the services involved in operating the server. It doesn't matter if you have 1 GB or 100 GB of data traffic, or how many surfers visit your web server, or how many sites you run on your server at the same time.
- ✓ **Strong Intel™ hardware, ultra-fast network connections, greatest security, best reliability & free technical support**
In the worldwide Bitpalast® NTT/VERIO IP data network, your web pages are delivered to customers faster and more securely. A security-enhanced operating system and a hacker alarm with instant notification of system monitoring are a matter of course. Up-to-the-minute data centers, 24/7 monitoring of the data centers, network and servers; free technical support via telephone, e-mail, and fax by personally designated contacts, and comprehensive documentation to assist you.

Bitpalast®, 1156 Abbott Lane, U.S.A.-Sun Prairie, WI 53590

¹) Includes 1 .com domain. An unlimited number of additional domain names can be leased for very low charges, such as .net or .org for only 9.95 US \$/year (tax-free for non-EU residents & companies). © 2008 Bitpalast GmbH. All rights reserved. Bitpalast® and the Bitpalast® logo are registered trademarks of Bitpalast GmbH. Other brands are registered trademarks of their respective owners.

Your Bitpalast® Hosting Artists' Server supports many pre-installed and installable applications such as Microsoft™ FrontPage™ extensions, PHP, Miva, compiler for C, C++ & Java™, Perl, Tcl, Python and Unix Shell programs, Urchin, Analog, http-analyze, Webalizer, mSQL, MySQL, PostgreSQL, Oracle Gateways, RealServer, Pretty Good Privacy, Majordomo, Procmail, Autoreply, TWIG, VNews, SSL² and many other ready-to-go applications as well as the over 14000 programs in the FreeBSD Ports collection. You can also of course install your own applications.

You can lease Bitpalast® Hosting Artists' Servers in three versions:
10 GB, 20 GB and 40 GB disk space. Features:

- ✓ Unlimited data transfer
- ✓ Root access
- ✓ Browser based server management:
CPX control panel gives you the opportunity to install sub-accounts
- ✓ Free realtime SPAM filtering possible via SpamAssassin
- ✓ Free realtime anti-virus tool ClamAV
- ✓ Controllable anonymous FTP with unlimited FTP access
- ✓ Three-fold data back-up (realtime hard disk mirroring, daily hard disk backup, weekly tape backup)
- ✓ Full Telnet & SSH access
- ✓ Access to httpd.conf file (web server configuration)
- ✓ Configuration & administration of Cron jobs
- ✓ Configuration & administration of mailing lists
- ✓ Your own CGI Scripts (e.g. Perl, PHP, Java™ servlets)
- ✓ SSI support
- ✓ Compiler access
- ✓ Seamless integration into your Windows environment as an "additional hard disk" possible
- ✓ Access to your own database server (e.g. MySQL, mSQL, PostgreSQL)
- ✓ Access to an SSL² server
- ✓ FreeBSD 6.x (Linux compatible) operating system
- ✓ Instead of interns in a call center, you have your own & salaried personal support expert at Bitpalast®.
