

Bitpalast® Hosting Field Staff Server

Use ACT!™, MS Office™, and other Windows™ data collaboratively, from anywhere, and at anytime

The Bitpalast® Hosting Field Staff Server works with your existing Windows™ system just like an extra hard drive in your PC. And if you're a field worker or similar, you can access your company's central records remotely. Your data are standardized for your team, they are accessible from anywhere, and available around the clock. You can also use the system as a web server and central e-mail server with no need for extra software or hardware.

- ✓ **Seamless integration into your Windows™ environment**
You see the Bitpalast® Hosting Field Staff Server as an additional network drive in Windows™ Explorer. All Windows™ programs, such as Word™, Excel™, and Powerpoint™, can load files from the Bitpalast® Field Staff Server and save them back to there. You can centrally deploy e.g. standardized Word™ templates for all employees, whether they work on the premises or in the field. Access correspondence and figures collaboratively. Work in comfort at home and on the move with the most current data, as if you were actually in the office.
- ✓ **For ACT!™ and many other Windows™ databases**
Save your ACT!™ database on the Bitpalast® Field Staff Server and you can access e.g. customer contacts from virtually anywhere. Any changes you make on the company premises are also immediately accessible to your field staff, just as any changes made by your field staff are seen immediately by your internal staff. Sketch out the tasks involved in a new order at a customer's premises and you are immediately sent the relevant offer "live" from your factory - open up a wealth of fantastic new opportunities!
- ✓ **Greatest security & three-fold data-backup**
Unbeatable separation and shielding from other customers in the Bitpalast® NTT/Verio high-security data center. A security-enhanced operating system and a hacker alarm with instant notification of system monitoring are a matter of course. The Bitpalast® data back-up includes RAID 1 Disk-to-Disk mirroring (real-time), hard disk back-ups (daily) and tape back-ups (weekly).
- ✓ **Best reliability & free technical support**
Up-to-the-minute data centers, 24/7 monitoring of the data centers, network and servers; free technical support via telephone, e-mail, and fax by personally designated contacts, and comprehensive documentation to assist you.
- ✓ **A real all-rounder for e-mail, any number of domains, and Internet applications**
The web server is included in the package, and you can operate an unlimited number of domains. For 25 of these domains, you get the legendary Bitpalast® Urchin Statistics free of charge. Plus you can choose from over 14000 easy-to-install, free-of-charge Internet applications.

There are practically no strings attached, and you can terminate the contract with only 14 days' notice to the end of the month.
