

## Bitpalast® Hosting Small Enterprise Server

### Your perfect opportunity to grow on the Internet

A Bitpalast® Hosting Small Enterprise Server offers more or less everything your own large server would, but its price is comparable to the Bitpalast® Starter Servers. Bitpalast® Hosting Small Enterprise Servers are ideal for companies with big requirements, a small budget, and limited internal IT technology.

- ✓ **Powerful performance**  
Strong Intel™ and Sparc™ hardware, ultra-fast network connections, and advanced performance management for optimal distribution of processing time, memory, and network load between the servers.<sup>1</sup> In the worldwide Bitpalast® NTT/VERIO IP data network, your web pages are delivered to customers faster and more securely. If required, your web server can be operated in whichever of the more than 100 Bitpalast® NTT/VERIO data centers is located in your customer's region.
- ✓ **Greatest security**  
Unbeatable separation and shielding from other customers – each Bitpalast® Hosting Small Enterprise Server has its own location;<sup>1</sup> A security-enhanced operating system and a hacker alarm with instant notification of system monitoring are a matter of course.
- ✓ **Best reliability & free technical support**  
Up-to-the-minute data centers, 24/7 monitoring of the data centers, network and servers; free technical support via telephone, e-mail, and fax by personally designated contacts, and comprehensive documentation to assist you.
- ✓ **Extraordinary adaptability**  
You can adapt your independent utilization options (e.g. web server, mail server, file server (even for Windows!) etc.) yourself. More than 14000 server add-ons from the FreeBSD Ports Collection can be installed quickly and easily.
- ✓ **Operate an unlimited number of domains!**  
You can become a provider yourself and rent out server space or operate an unlimited number of domains for various companies. You can deploy the legendary Bitpalast® Urchin Statistics for 100 of these

domains. Due to the fact that a Bitpalast® Hosting Small Enterprise Server essentially works as would a server of your own, you can use this foolproof platform to learn how to operate an even more powerful system. This enables Bitpalast® to smooth your accession into the top class.

There are practically no strings attached, and you can terminate the contract with only 14 days' notice to the end of the month (which Bitpalast® would naturally regret very much). You have complete freedom to plan your company's future thanks to the fact that you can move up to a larger system at any time.

1) Bitpalast® Hosting Small Enterprise Servers are "virtual servers." They share a powerful computer with other customers' servers. However, thanks to a unique shielding and security system, every Small Enterprise Server works independently of the other customers' servers. Thanks to this solidarity principle, each operator of a Small Enterprise Server receives a system environment, usually only available for large, stand-alone servers, at an entry level price. © 2008 Bitpalast GmbH. Your Bitpalast® Hosting Small Enterprise Server supports many pre-installed and installable applications such as Microsoft™ FrontPage™ extensions, PHP, Miva, compiler for C, C++ & Java™, Perl, Tcl, Python and Unix Shell programs, Urchin, Analog, http-analyze, Webalizer, mSQL, MySQL, PostgreSQL, Oracle Gateways, RealServer, Pretty Good Privacy, Majordomo, Procmail, Autoreply, TWIG, VNews, SSL<sup>2</sup> and many other ready-to-go applications as well as the over 14000 programs in the FreeBSD Ports collection. You can also of course install your own applications.

You can lease Bitpalast® Hosting Small Enterprise Servers in three versions: 10 GB, 20 GB or 40 GB disk space. Features:

- ✓ Unlimited data transfer
- ✓ Root access
- ✓ Browser based server management:  
CPX control panel gives you the opportunity to install sub-accounts
- ✓ Free realtime SPAM filtering possible via SpamAssassin
- ✓ Free realtime anti-virus tool ClamAV
- ✓ Controllable anonymous FTP with unlimited FTP access
- ✓ Three-fold data back-up (realtime hard disk mirroring, daily hard disk backup, weekly tape backup)
- ✓ Full Telnet & SSH access
- ✓ Access to httpd.conf file (web server configuration)
- ✓ Configuration & administration of Cron jobs
- ✓ Configuration & administration of mailing lists
- ✓ Your own CGI Scripts (e.g. Perl, PHP, Java™ servlets)
- ✓ SSI support
- ✓ Compiler access
- ✓ Seamless integration into your Windows environment as an "additional hard disk" possible
- ✓ Access to your own database server (e.g. MySQL, mSQL, PostgreSQL)
- ✓ Access to an SSL<sup>2</sup> server
- ✓ FreeBSD 6.x (Linux compatible) operating system
- ✓ Instead of interns in a call center, you have your own & salaried personal support expert at Bitpalast®.
