

Bitpalast® Hosting Starter Server

This is the start of your Internet success story.

A website's success doesn't depend on the amount of server space or the number of email addresses you have. The speed and security with which your pages are delivered is important. It's important for your website to be online at all times. It's also important to have a strong partner at your side to assist with any task. Bitpalast® is this strong, experienced partner. With Bitpalast® you have a personally designated contact who helps you guide your website to success.

✓ **Personal support right from the outset**
There are no call center agents at Bitpalast® – instead you speak to your personal consultant. This enables Bitpalast® to support you better in achieving your goals. You receive free technical support via phone, e-mail, and fax from personally designated contacts.

✓ **Highest speed & greatest possible security**
In Bitpalast®'s global NTT/VERIO IP data network, only data are transported, no speech. This enables your web pages to be transferred faster and more securely. Bitpalast® data centers are housed in protected buildings that either meet or exceed all standards in terms of electricity supply, fire protection, access control, and data security. This makes Bitpalast® Hosting Starter Servers practically failure-free and guarantee 99.8% uptime.

✓ **Top-class website equipment**
Bitpalast® has invested in areas where you benefit, for instance in the Bitpalast® Urchin Statistics, contained free-of-charge with every Bitpalast® Hosting Starter Server. Instead of meaningless access figures, Urchin Statistics enables you to identify meaningful user statistics, track the route users take through your site, and much more. The Bitpalast® Hosting Starter Servers contain the services you need to operate a professional and success-oriented website.

✓ **Reliable, durable, and growth-oriented**
Many competitors come and go. Bitpalast®, on the other hand, stands for reliability and longevity. Bitpalast® Hosting Starter Servers enable you to start small and, if you hit the big time, you can move up to a larger web server whenever you like. Bitpalast® has the right solution for all requirements.

✓ **Risk-free entry**
Start with no risk with a Bitpalast® Hosting Starter Server: there are no strings attached, and you can terminate the contract with only 14 days' notice to the end of the month (which Bitpalast® would naturally regret very much).

Bitpalast®, 800 Prairie Run, U.S.A.-Sun Prairie, WI 53590
